

Financial overview Anan Clinica 2012

In 2012 we continued with the activistas programme that was launched in 2010. Under the supervision of Feliciano, who is employed by the foundation, and in cooperation with the volunteers from the State University in Groningen, the activistas have carried out several projects. In 2012 the focus of these projects was on malaria, malnutrition, diarrhoea and drinking water.

The pie-chart below shows the allocation of the cost. Local costs relate to running the activistas programme, local salaries and for special projects (e.g. a water test kit). Non-local costs includes administration, bank, and site hosting costs.

To finance the project we fully depend on donations and so we are very grateful for the donations we have received in 2012.
