

Financial overview Anan Clinica 2010

2010 was the first operational year of the foundation Anan Clinica. All operations were funded by donations. During the year several deeds were initiated to fund the foundation and we are very thankful for the effort taken to start these initiatives and to all the people who financially sponsored the foundation. Thanks to you we were able to start and run a very effective activists programme!

A couple of initiatives we would like to highlight are: the goodbye party of Lutske, the birthday of Carlijn's grandmother (as a birthday present she asked for a donation to Anan Clinica) and the well-fare donations in the practice of Iet.

During the year we spent EUR 2,715. Most of the money was spent on the activists programme. Other costs were the website, administration costs (bank costs and the express costs of sending computers to Mozambique), marketing costs to print the booklets and the salary of the local program manager Gildo. Below you can find the split of the different cost categories.
