

Financial overview 2021 – notes on the accounts

With the Covid-19 virus still playing a major role in the world, it still wasn't possible for volunteers to come to Mozambique, and thus unfortunately, we had another year without volunteers.

The activists have continued to work on many projects, varying from teaching around malaria, malnutrition, family planning and the coronavirus. The biggest project this year (where also most of the investments this year have been going to) has been the water project (like last year). There have been great advancements in providing drinking water for all the local people. However, as there are still many tests that need to be performed, next year this will remain a priority.

This year we had two major donors, Diaconie Protestantse Gemeente Haarlem, and Zonel Energy Systems.

Financial overview 2021 – accounts

Donations		€18.098,35
Administrative costs	IT costs	€0
	Bank costs	€143,10
Local program costs		€4.334
